

Breath Alcohol Simulator Solution Analysis

Test No. 21-5681 Summary Report

Each sample pack consisted of two bottles of solution. Participants were requested to analyze each item and report the resultant Breath Alcohol Concentration (BrAC). Data were returned from 96 participants and are compiled into the following tables:

This report contains the data received from the participants in this test. Since these participants are located in many countries around the world, and it is their option how the samples are to be used (e.g., training exercise, known or blind proficiency testing, research and development of new techniques, etc.), the results compiled in the Summary Report are not intended to be an overview of the quality of work performed in the profession and cannot be interpreted as such. The Summary Comments are included for the benefit of participants to assist with maintaining or enhancing the quality of their results. These comments are not intended to reflect the general state of the art within the profession.

Manufacturer's Information

Each sample pack consisted of two 500mL bottles of solution. Participants were requested to analyze each item and report the resultant Breath Alcohol Concentration (BrAC).

ITEMS 1 and 2 (PREPARATION): Sample preparation consisted of combining a predetermined volume of ethanol and water. Each solution was mixed and left to equilibrate before being sent for predistribution testing.

SAMPLE SET ASSEMBLY: A sample pack was prepared containing an Item 1 and 2.

VERIFICATION: Laboratories that conducted predistribution analysis of the samples reported consistent results that were comparable to the preparation Breath Alcohol Concentrations.

| <u>Item</u> | <u>Preparation BrAC</u> |
|-------------|-------------------------|
| 1 | 0.10 |
| 2 | 0.23 |

Please note that the Preparation BrAC is the value used for calculations during the test preparation phase and may not necessarily represent the final concentration of the samples. It is advised to wait for the Grand Mean statistics available in the Summary and Individual Reports before evaluating performance.

Summary Comments

This test was designed to allow participants to assess their proficiency in the analysis of breath alcohol simulator solutions. Each participant was supplied with a sample set consisting of two 500mL bottles of solution (Refer to Manufacturer's Information for production details). Data are separated into Tables 1 and 2 by port used. Each table is further sorted by item number and assigned production batch.

Some participants reported both Infrared (IR) and Electrochemical Fuel Cell (EC) results; thus, the number of entries in the table summaries may not be the same as the number of participants. Out of 96 total participants, 80 participants reported results utilizing the Calibration Port and 37 participants reported results utilizing the Breath Port.

The grand mean and standard deviation for both items were calculated utilizing the raw data. They are provided to assist participants in determining the acceptability of the results per their laboratory policies. Any participants with "extreme" data (± 5 STD from grand mean) is marked with an "X" and their results are excluded from the calculations of the grand mean and standard deviation. There were four participants that reported "extreme" data in this test cycle. Three of these appear to have made a typo in 1 of the 9 submitted data points for one of their sets of results.

Instructions

Test the simulator solutions provided using either the calibration port and/or the breath port of your breath test instrument following your laboratory's procedure (except where noted).

Please review the data sheet in its entirety prior to beginning the analysis as there are specific instructions within the reporting sections. Be advised that there are separate reporting sections for results obtained using the calibration port versus the breath port.

Items Submitted (Sample Pack BR):

Item 1: Breath Alcohol Simulator Solution I.

Item 2: Breath Alcohol Simulator Solution II.
