

## **Drug Analysis**

# **Test No. 22-5002 Summary Report**

---

Each sample pack consisted of two questioned samples containing powder substances, which participants were requested to analyze. Data were returned from 636 participants and are compiled into the following tables:

<b>Report Contents:</b>	<u>Page</u>
<a href="#"><u>Manufacturer's Information</u></a>	<u>2</u>
<a href="#"><u>Summary Comments</u></a>	<u>3</u>

<a href="#"><u>Appendix: Data Sheet</u></a>	

This report contains the data received from the participants in this test. Since these participants are located in many countries around the world, and it is their option how the samples are to be used (e.g., training exercise, known or blind proficiency testing, research and development of new techniques, etc.), the results compiled in the Summary Report are not intended to be an overview of the quality of work performed in the profession and cannot be interpreted as such. The Summary Comments are included for the benefit of participants to assist with maintaining or enhancing the quality of their results. These comments are not intended to reflect the general state of the art within the profession.

Participant results are reported using a randomly assigned "WebCode". This code maintains participant's anonymity, provides linking of the various report sections, and will change with every report.

## **Manufacturer's Information**

Each sample pack consisted of two items. Item 1 contained two blank blotter paper tabs. Item 2 contained two blotter paper tabs each consisting of 100 $\mu$ g of Lysergic acid diethylamide (LSD). LSD is a Schedule I controlled substance in the United States.

### SAMPLE PREPARATION-

The LSD used to prepare Item 2 was a pure powder.

ITEM 1 (PREPARATION): Two blank blotter paper tabs (no controlled substances added) were deposited into a glassine bag which was folded and secured with a label. The folded glassine bag was placed into a small zip top bag, which was heat sealed and then placed into a pre-labeled envelope.

ITEM 2 (PREPARATION): LSD powder was dissolved in 70% ethanol to create a solution. A 25 $\mu$ l aliquot of this spiked solution was dispensed onto each blotter paper tab, which were allowed to dry fully before packaging. Two blotter paper tabs were deposited into a glassine bag which was folded and secured with a label. The folded glassine bag was placed into a small zip top bag, which was heat sealed and then placed into a pre-labeled envelope.

SAMPLE PACK ASSEMBLY: One of each of the Item 1 and Item 2 envelopes was placed into a larger pre-labeled sample pack envelope.

VERIFICATION: The above substance was identified by predistribution laboratories, who used the following combined list of techniques: color tests, UV, GC/MS, GC.

## **Summary Comments**

---

This test was designed to allow participants to assess their proficiency in the qualitative analysis of questioned samples that may contain controlled substances. Each sample pack consisted of two items. Item 1 consisted of two blank blotter paper tabs (no controlled substance added). Item 2 contained two blotter paper tabs each consisting of 100 $\mu$ g of Lysergic acid diethylamide (LSD). In the United States, LSD is a Schedule I controlled substance. (See Manufacturer's Information for preparation details).

For Item 1, 631 of 636 participants (99%) reported no controlled substance detected/identified. The remaining 5 participants reported Methamphetamine, LSD and/or 2CT-2. For Item 2, 625 of 636 participants (98%) reported LSD, with one of these also reporting "No controlled substance" as well. No controlled substance detected/identified was reported by 10 participants, with one reporting 2CT-2.

The most common examination methods reported for both items include GC/MS, color tests, GC and UV.

# Additional Comments

TABLE 3

WebCode	Additional Comments
2KXXUU	In [Country], Lysergic acid diethylamide (LSD) is listed in the first scheduled of The Dangerous Drugs Act 1952.
39LGTW	Each tab was independently analyzed in both items.
3RFNTV	Methamphetamine and D-Lysergic Acid Diethylamide (LSD) are listed in The First Schedule of Dangerous Drug Act 1952.
3U84JB	Isomer not determined.
49CF7F	Both items contained two paper tabs; only a portion of one was analyzed.
4RBGE7	It should be noted my results for Item 1 were, "No Controlled Dangerous Substance Identified". This means utilizing [Laboratory] Controlled Substances protocols and techniques, I did not identify a CDS.
69WCHF	Only one perforated tab for each item was tested
6Z37K9	Item no1. was found to have no controlled substances. Item no2. was found to contain LSD.
7BYQ3R	Item 1 - No controlled substance detected. Item 2 was found to contain D-Lysergic acid N,N-diethylamide. D-Lysergic acid N,N-diethylamide is a controlled substance under Dangerous Drug Act 1952.
7RJFFT	Item 1 replacement sample (2 tabs) was analysed
7URJCP	One full paper square (Item #1) and consumed in the examination process. A portion (1/2) of the second paper square (Item #1) was consumed in the examination process. Both paper squares (Item #2) were consumed in the examination process. Lysergic Acid Diethylamide (LSD) was indicated to be present on both squares, but was only confirmed to be present on one of the paper squares.
8H9FFP	Item 1 and Item 2 was found to contain caffeine.
8PV4E2	Lab does not test for salts or diluents.
AJK3YH	IN THE ITEM #2 COMPARES WITH LIBRARY OF THE INSTRUMENTS (GC/MS) RESULT LSD. DO NOT CERTIFIED THE PRESENCE OF CONTROLLED SUBSTANCES BECAUSE THE REFERENCE MATERIAL IS NOT AVAILABLE TO CONFIRM THE RESULT.
AUGKFM	Since the squares were not connected to each other, I had to work each square. Each square was consistent with its counterpart. A color test was performed on the first items first square but not the second due to the amount of sample present.
AX8HDU	For both samples: - First test was performed as a native analysis; - Second test was performed as a derivative analysis (TMS).
DLN3BW	Item 2-Caffeine, a non-controlled substance was also detected.
E22PHT	Item 1 only had 1 tab not 2 as stated
EAVUBU	Lab does not test for salts or diluents
EB7W2Y	Item 2 - Sample not quantitated. There is a pure drug weight requirement, but the laboratory does not currently have a quantitative method for this drug.
EWTPH2	Since Item 1 was separated into 2 blotter paper sections, I split them out as 1.1 and 1.2 and analyzed both. Results: No controlled substances for both Item 1.1 and 1.2. Since Item 2 was separated into 2 blotter paper sections, I split them out as 2.1 and 2.2 and analyzed both. Results: LSD for both Item 2.1 and 2.2

TABLE 3

WebCode	Additional Comments
FYGHTB	The samples were initially concentrated prior to instrumental analysis for run 1. Samples were concentrated again for run 2. For run 3, the remaining portion of the paper squares were consumed for analysis and again concentrated after soaking in MeOH overnight in the refrigerator. A procedural MeOH blank was run before the GC and GC/MS runs. The items were analyzed separately.
GA8YVG	Making a composite sample of the two items from Item 2 was necessary for positive identification.
GHLK77	The amount of sample for this type of material was not sufficient to ensure adequate reporting. The drug reported is a difficult drug within any analysis. In addition, if there was a question on the reported result, there is not enough sample for adequate retesting.
GTKBRD	Item 1: No controlled substances detected. Item 2: Positive for Lysergic Acid Diethylamide (LSD), Schedule I CDS. The actual net weight is 0.0214grams.
H6RATE	Item 1: low level peaks were detected from the sample, however, no controlled drugs could be identified during the routine analysis.
HRAT7M	Item # 1: One of two paper tabs analyzed. Item # 2: One of two paper tabs analyzed
HWYZF3	Both tabs submitted in item one were tested. Only one of the two tabs submitted in item 2 was tested.
KPQ6NE	The challenge is to get stronger intensity of LSD found in this item 2.
LCJ86C	For item 1 was unable to identify as possible presence of methamphetamine was detected in GCMS, however no possible presence of methamphetamine was detected in the UV analysis and that was only for one tab in item 1 and not in the 2nd tab of item 1.
LKUXKV	Only one tab received in Item 1
LNV2CH	2A [Item 2 Results]: 0.021 (+/- 0.003) grams (2 abuse units) containing Lysergic acid diethylamide; both were analyzed.
LZKZZZ	Item 2 both blotters contained 0.067 mg LSD.
M38YR3	I wish to enter for item 2 the following Laboratory analysis of the sample finds evidence of lysergic acid N, N- diethylamide, also known as LSD, based on technical reference library searches. Lysergic acid N, N- diethylamide is a Schedule I controlled substance. The system is locked and will not allow me to add "controlled substance" after Schedule 1 in upper box. I had put it there yesterday before saving, however something went wrong {limited character issue}.
MUDRD4	Item 1 was sub-itemized as Item 1A and 1B and were tested separately. All methods used to examine Item 1A and 1B are listed in question 1b.
NR7P6E	Only one square from each item was tested.
P3WYVR	I weighed and analyzed both of the paper tabs in item 1 (subitemized as 1A and 1B). I treated item 1A as suspected LSD due to my color tests results; I did not detect lysergic acid diethylamide (LSD) in item 1A. I treated 1B as an unknown substance and I did not detect any controlled substances in 1B.
RQYW8F	Item #1 - No weight obtained. Item #2 - No weight obtained
TG9HDB	Analyzed both tabs of paper individually from item 1. No controlled substances were detected in either tab from item 1. Analyzed one of the two tabs of paper from item 2. Lysergic Acid Diethylamide (LSD) was identified in the one tab that was analyzed from item 2. No analysis was performed on the second tab.
TUZUFT	Only one of two paper square submissions in each item were chemically tested. All four were observed under UV and found to fluoresce. The compound found in Item 2 is also known as LSD
TXG4PQ	One square tested for each Item.

TABLE 3

WebCode	Additional Comments
U2ECK8	Both tabs in item 1 were analyzed and contained no controlled substances. One of two tabs from item 2 contained LSD. The other tab was only screened for florescence under UV. No confirmation analysis was performed on the second tab.
U2TWPX	For each item, only one of the two paper tabs were analyzed.
U3YFX7	We obtain 42 µg/tab of LSD for the item 2.
U8TGXZ	Upon analysis, I found that Item 1 not to contain any controlled substance while Item 2 to contain LSD.
U9CZ6R	Each item contained two squares, but only one square was analyzed from each pair.
UAJFDJ	Under normal case circumstances, items 1 and 2 would not be examined at our laboratory due to the amount of material present in each item. Paper tab examination typically requires 4 or more tabs for a full analysis that includes multiple extractions and presumptive color screening.
UT3NT8	GC in item 2 is for the retention time [Laboratory] treats each separate square as an individual item. All 4 squares were tested.
UTG8GB	Item 1, one paper tab was analyzed. Item 2, one paper tab was analyzed.
V8E8NY	I would recommend giving 4 blotter squares in future tests if blotter squares are given
V8Q24Y	Methamphetamine and lysergic acid diethylamide (LSD) are listed in First Schedule of Dangerous Drug Act 1952
VXM3H	This would normally be considered insufficient for analysis and not analyzed due to the small sample size. We would typically use 4-5 tabs for analysis.
WGCK7B	Lab does not test for salts or diluents
WX6B7E	Item 1 contained only 1 paper tab.
XZBAFR	GC (retention time) and GC/MS
YN92R2	Item 2 contains Lysergic acid diethylamide (LSD) which listed under First Schedule Dangerous Drug Act 1952.
YQHV3V	For the Item 2 the substance was reported as preliminary, due to no reference material is available to report a confirmed result of the substance mentioned above [Table 2a - Drug Analysis (Item 2)].
ZCD7BK	All remaining sample in Items 1 and 2 were consumed during the analysis process (both pieces of paper in each item were combined for analysis).
ZN2GBB	The positional isomer form of LSD could not be determined. FTIR was not relied upon for the confirmation of this substance.

**-End of Report-  
(Appendix may follow)**

## Test No. 22-5002: Drug Analysis

DATA MUST BE SUBMITTED BY **Nov. 14, 2022, 11:59 p.m.** TO BE INCLUDED IN THE REPORT

Participant Code: U1234E

WebCode: 239WJ7

The Accreditation Release section can be accessed by using the "Continue to Final Submission" button above. This information can be entered at any time prior to submitting to CTS.

### Scenario:

An investigator has submitted two questioned samples for analysis, Item 1 consisting of two paper tabs and Item 2 consisting of two paper tabs. Please examine the samples and determine if any controlled substances are present.

*Please note: The controlled status of substances is based on the list in section 1308 of Title 21 Code of Federal Regulations under the United States Controlled Substances Act.*

### Items Submitted (Sample Pack DA2):

Item 1: Two paper tabs

Item 2: Two paper tabs

### 1a.) Were any controlled substances present in Item 1? If yes, list each substance.

- No controlled substance detected/identified  Controlled Substance(s) detected/identified (please list below).  
Indicate salt form if determined.

### 1b.) What methods were used to examine Item 1?

(If color and/or crystal tests are used, please simply check the appropriate method below. Specific color and crystal tests will not be listed in the summary report.)

Color Tests

FTIR

LC

UV

GC

Crystal Tests

TLC

LC/MS

Raman

GC/MS

Other (specify):

**2a.) Were any controlled substances present in Item 2? If yes, list each substance.**

No controlled substance detected/identified

Controlled Substance(s) detected/identified (please list below).  
Indicate salt form if determined.

**2b.) What methods were used to examine Item 2?**

(If color and/or crystal tests are used, please simply check the appropriate method below. Specific color and crystal tests will not be listed in the summary report.)

Color Tests  FTIR  LC  UV  GC   
Crystal Tests  TLC  LC/MS  Raman  GC/MS

Other (specify):

**3.) Additional Comments**

*Please note: Any additional formatting applied in the free form space below will not transfer to the Summary Report and may cause your information to be illegible. This includes additional spacing and returns that present your responses in lists and tabular formats.*

## RELEASE OF DATA TO ACCREDITATION BODIES

The Accreditation Release is accessed by pressing the "Continue to Final Submission" button online and can be completed at any time prior to submission to CTS.

CTS submits external proficiency test data directly to ASCLD/LAB, ANAB, and/or A2LA. Please select one of the following statements to ensure your data is handled appropriately.

- This participant's data is intended for submission to ASCLD/LAB, ANAB, and/or A2LA. (Accreditation Release section below must be completed.)
- This participant's data is not intended for submission to ASCLD/LAB, ANAB, and/or A2LA.

Have the laboratory's designated individual complete the following steps **only if your laboratory is accredited in this testing/calibration discipline** by one or more of the following Accreditation Bodies.

**Step 1: Provide the applicable Accreditation Certificate Number(s) for your laboratory.**

ANAB Certificate No.   
(Include ASCLD/LAB Certificate here)

A2LA Certificate No.

**Step 2: Complete the Laboratory Identifying Information in its entirety.**

Authorized Contact Person and Title

Laboratory Name

Location (City/State)
