Collaborative Testing Services, Inc
FORENSIC TESTING PROGRAM

Latent Print Examination Test No. 17-5171/2/5 Summary Report

This test was sent to 541 participants. Each sample pack contained one of the following: digitally produced photographs (17-5171), a DVD containing digital images (17-5172), or directly downloadable digital images (17-5175) of eleven latent prints and four sets of known finger and palm imprints. Participants were asked to compare these items and report their findings. Data were returned from 438 participants (81% response rate): 300 for 17-5171, 99 for 17-5172, and 39 for 17-5175 and are compiled into the following tables:

This report contains the data received from the participants in this test. Since these participants are located in many countries around the world, and it is their option how the samples are to be used (e.g., training exercise, known or blind proficiency testing, research and development of new techniques, etc.), the results compiled in the Summary Report are not intended to be an overview of the quality of work performed in the profession and cannot be interpreted as such. The Summary Comments are included for the benefit of participants to assist with maintaining or enhancing the quality of their results. These comments are not intended to reflect the general state of the art within the profession.

Participant results are reported using a randomly assigned "WebCode". This code maintains participant's anonymity, provides linking of the various report sections, and will change with every report.

Manufacturer's Information

Each sample pack contained either photographs or digital images consisting of known finger and palm imprints of four individuals and eleven latent "crime scene prints". Nine of the eleven latent prints were made by individuals for whom inked imprints were provided; two were from an individual for whom inked prints were not provided.

SAMPLE PREPARATION: All inked known fingerprints and lifted, powder-dusted latent prints were scanned directly into image editing software and assembled onto test templates. Background noise of each latent print was digitally reduced. The latent prints were provided in 1X and 2X magnification on the physical photographs.

VERIFICATION: Prior to predistribution, the latent prints were analyzed and confirmed by an external advisor to present appropriate detail, clarity, and difficulty. The expected Identification and Not Identified responses were reported by the predistribution examiners.

SAMPLE PACK ASSEMBLY: Once verification was complete and sample preparation was done, each photo set was placed into a pre-labeled sample pack envelope, sealed with evidence tape, and initialed with "CTS." Each DVD was checked to ensure all images were accessible. Digital download media were provided in a zipped file uploaded to the CTS portal.

Latent No.	Print Source	
Q1	Item C, Left Middle	(C, LM)
Q2	Item D, Right Middle	(D, RM)
Q3	Not Provided, -	(NI)
Q4	Item B, Right Index	(B, RI)
Q5	Item A, Right Palm	(A, RP)
Q6	Item A, Left Middle	(A, LM)
Q7	Item C, Left Ring	(C, LR)
Q8	Item B, Left Middle	(B, LM)
Q9	Item D, Left Little	(D, LL)
Q10	Not Provided, -	(NI)
Q11	Item C, Right Palm	(C, RP)

Summary Comments

This test was designed to allow participants to assess their proficiency in the identification of latent finger and palm prints. Nine latent prints (Q1-Q2, Q4-Q9, Q11) were made by one of four individuals for whom inked prints were provided (Items A-D). Two latent prints (Q3, Q10) were from an individual for whom inked prints were not provided (Refer to the Manufacturer's Information for preparation details).

Of the 438 responding participants, 424 (97%) reported the expected nine identifications and two non-identifications. There were fourteen participants who reported inconsistent results for one or more of the latents. Consensus outliers are described as follows, with the types of outlying responses provided in parentheses following each description.

There were six participants who attributed a latent to a different finger/palm than that established by the consensus (Other Identifications). There were eight participants who did not identify one or more latents for which known prints were provided (Not Identified). The most common inconsistent result was the missed identification of Item Q9.

Latent Print Identifications

Additional Comments

TABLE 2

WebCode-Test	Additional Comments
3UH8MK-5172	Q5: Right palm below #5. Q11: Right palm - hypothenar (by delta)
4YRMR3-5171	L-3 had some similarities to LI of C - however a better record would have been preferred for comparison, there are things that don't line up right, but the record is poor quality
6EFWUD-5171	Q1 - USED FLATS. Q7 - USED FLATS
F6DTGX-5171	Q3 and Q10 Supplied POI'S excluded.
KKBU2F-5171	Q7 - used flat.
LYA4JU-5171	The test that was formerly administered by [Agency] was better, there was the option to review and compare the latent prints electronically or print to print. That factor was more realistic then having to make every ident off of print to print comparison, especially since we have access to [Database] and have been trained at both. I feel that I could have made more idents quicker via electronic means vs soley using print to print. I feel that this test was unfair and unrealistic in that sense. Perhaps this will be taken into future consideration since it is apparent that with the inclusion of a scenario you aim is to make the practical exercise as realistic as possible.
RYM4ZH-5172	The FRD on the standards submitted, Items A, B, C, and D has been excluded as the source of the FRD on Q3 and Q10.
TZUKEL-5171	It will be easier if electronic images were given
VYVF7C-5172	Latent prints were not challenging enough. The pattern was visible in every latent, which is not good. The latent prints from palms were very easy to locate too. In the future we would like to have more challenging test latents: latents where the pattern is not visible, only partial latents etc.

Appendix: Data Sheet

*****

Test No. 17-5171: Latent Print Examination

DATA MUST BE RECEIVED BY _October 16, 2017_ TO BE INCLUDED IN THE REPORT

Participant Code: WebCode:

Accreditation Release Statement

CTS submits external proficiency test data directly to ASCLD/LAB, ANAB and A2LA. Please select one of the following statements to ensure your data is handled appropriately.

☐   This participant's data is intended for submission to ASCLD/LAB, ANAB, and/or A2LA. **(Accreditation Release section on the last page must be completed and submitted.)**

☐   This participant's data is **NOT** intended for submission to ASCLD/LAB, ANAB or A2LA.

Scenario:

Police are investigating a case of personal property vandalism. While out of town, the home of Mary Blanchard and David Nolan was damaged with spray paint, a window broken, and garbage deposited throughout the lawn area. The victims identified two possible suspects, neighbors Regina Mills and R.C. Gold, who had heated disagreements with the couple in the past. Investigators have supplied you with images of eleven latent prints collected from the scene. They have also provided you with images of known prints from the two victims, as well as the two suspects.

Items Submitted (Sample Pack LPP2 -Photographs):

Item A: Known finger and palm prints of homeowner Mary Blanchard.

Item B: Known finger and palm prints of homeowner David Nolan.

Item C: Known finger and palm prints of suspect Regina Mills.

Item D: Known finger and palm prints of suspect R.C. Gold.

Items Q1-Q11: Eleven latent prints recovered from the scene.

1.) Indicate the results of your comparisons by marking the appropriate boxes.

Please indicate the specific finger or palm identified for each latent print in this test.
If an identification cannot be made, check "Not Identified," do NOT leave a blank response.
If the identification of a latent fingerprint is made utilizing the palm print exemplar, please indicate ONLY the identified finger in the chart. The exemplar used for identification (e.g. LP, RP) may be documented in the Additional Comments section, but is not required.

RELEASE OF DATA TO ACCREDITATION BODIES

The following Accreditation Releases will apply only to:

Participant Code: WebCode:

for Test No. **17-5171**: **Latent Print Examination**

This release page must be completed and received by **_October 16, 2017_** to have this participant's submitted data included in the reports forwarded to the respective Accreditation Bodies.

Have the laboratory's designated individual complete the following steps
only if your laboratory is accredited in this testing/calibration discipline
by one or more of the following Accreditation Bodies.

Step 1: Provide the applicable Accreditation Certificate Number(s) for your laboratory

ASCLD/LAB Certificate No. _____

ANAB Certificate No. _____

A2LA Certificate No. _____

Step 2: Complete the Laboratory Identifying Information in its entirety

Signature and Title _____

Laboratory Name _____

Location (City/State) _____

Accreditation Release

Return Instructions

Please submit the completed Accreditation Release at the same time as your full data sheet. See Data Sheet Return Instructions on the previous page.
