

Latent Print Examination Test No. 24-5171/5 Summary Report

Each sample pack contained one of the following: physically printed photographs (24-5171) or downloadable digital images (24-5175) of eleven latent prints and four sets of known fingerprints and palm prints. Participants were asked to compare these items and report their findings. Data was returned from 332 participants: 142 for 24-5171, and 190 for 24-5175 and are compiled into the following tables:

| | <u>Page</u> |
|--|---------------------------|
| <u>Manufacturer's Information</u> | <u>2</u> |
| <u>Summary Comments</u> | <u>3</u> |
| <u>Table 1: Latent Print Comparisons</u> | <u>4</u> |
| <u>Table 2: Additional Comments</u> | <u>21</u> |
| <u>Appendix: Data Sheet</u> | |

This report contains the data received from the participants in this test. Since these participants are located in many countries around the world, and it is their option how the samples are to be used (e.g., training exercise, known or blind proficiency testing, research and development of new techniques, etc.), the results compiled in the Summary Report are not intended to be an overview of the quality of work performed in the profession and cannot be interpreted as such. The Summary Comments are included for the benefit of participants to assist with maintaining or enhancing the quality of their results. These comments are not intended to reflect the general state of the art within the profession.

Participant results are reported using a randomly assigned "WebCode". This code maintains participant's anonymity, provides linking of the various report sections, and will change with every report.

Manufacturer's Information

Each sample pack contained photographs, in either a physically printed format or digitally downloadable, consisting of known fingerprints and palm prints of four individuals and latent "crime scene prints" as listed below. Participants were asked to indicate the specific finger or palm identified for each latent print in this test.

SAMPLE PREPARATION: All inked known fingerprints and powder-dusted latent prints were scanned directly into image editing software. Images were assembled onto test templates, and background noise of each latent print was digitally reduced. For the physical photographs, the latent prints were provided in 1x and 2x magnification.

VERIFICATION: Predistribution results were consistent with each other and the manufacturer's preparation information.

SAMPLE PACK ASSEMBLY: Once verification was complete and sample preparation was done, each photo set was packaged and sealed. Digitally downloadable material was zipped and uploaded to the CTS Portal.

| Latent No. | Print Source |
|-------------------|------------------------------|
| Q1 | Item A, Right Little (A, RL) |
| Q2 | Not Provided, - (NI) |
| Q3 | Item C, Left Ring (C, LR) |
| Q4 | Item A, Right Middle (A, RM) |
| Q5 | Item B, Right Palm (B, RP) |
| Q6 | Item D, Right Thumb (D, RT) |
| Q7 | Item D, Left Ring (D, LR) |
| Q8 | Not Provided, - (NI) |
| Q9 | Item D, Left Middle (D, LM) |
| Q10 | Item C, Right Thumb (C, RT) |
| Q11 | Item D, Left Palm (D, LP) |

Summary Comments

This test was designed to allow participants to assess their proficiency in the comparison of latent finger and palm prints. Nine latent prints (Q1, Q3-Q7, Q9-Q11) were made by the four individuals for whom inked prints were provided (Items A-D). Two latent prints (Q2 and Q8) were from one individual for whom inked prints were not provided. Refer to the Manufacturer's Information for preparation details.

Of the 332 responding participants, 315 (94.9%) reported the nine identifications and two non-identifications (NI) consistent with the manufacturer's preparation information. In establishing the consensus, inconclusive (INC) results are included with non-identifications.

There were seventeen participants who reported inconsistent results for one or more of the latent prints. Of these, the following trends were noted. The Q6 latent print had the highest number of inconsistent non-identifications(4). The Q7 and Q9 latent prints had the highest level of inconclusive responses(4, 2 respectively), with participants reporting overall inconclusive, or identifying the individual but reporting inconclusive on the selection of the digit or palm. Some participants identified these latent prints to the individual's palm. The participants who reported inconclusive for Q7 and/or Q9 stated that there were similarities to the manufacturer's preparation information for each, but lacked sufficient support for an identification.

Several participants indicated in their additional comments that the Q7 and Q9 latent prints were of the medial (secondary) phalange of the finger. CTS added the following statement to the Data Entry Form on 30 September 2024: "For data submission purposes, consider all phalanges of a finger as part of the finger, not the palm." This statement will be maintained on all future Latent Print proficiency tests.

Latent Print Comparisons

Additional Comments

TABLE 2

| WebCode-Test | Additional Comments |
|--------------|---|
| 27FZX9-5175 | Q7 #9 LR middle phalange (8). Q9 #8 LM middle phalange (7). |
| 3LL87R-5175 | Q7 - D LR medial phalange Q9 - D LM medial phalange |
| 4PU3BM-5171 | Impression Q7 compared to Item D #9 Left Ring, medial segment. Observed significant features in agreement (within tolerance) and no features in disagreement (outside of tolerance) but have not reached threshold needed to justify an identification conclusion in casework. Features observed were generally low specificity given the anatomical location and lack of patterning found in that area. Additionally the quality of the impression affected the level of confidence in the features that were observed. Additional exemplars needed to complete comparison- specifically the left side of the medial joint of finger #9 Left Ring. Due to the level of agreement found, no comparisons to other exemplars are required. Visual analysis and comparison documentation included in case notes. |
| 4TU2UT-5175 | Items A, B, C, and D have been excluded as the source of the FRD on Items Q2 and Q8. |
| 86TD9G-5175 | In casework and per our SOPs, I would report that Q6 is inconclusive to Item D due to the quality of the latent print and I would exclude Items A, B, and C as originating from the same source as Q6. In my case notes I would document that I am unable to exclude Q6 from the right thumb of Item D due to observed correspondence; and I am unable to ID Q6 to the right thumb of Item D due to the distortion present in the latent print. If I were using the OSAC expanded conclusion scale, I would report strong support for same source. |
| 8E3VUL-5171 | Q7 - D L/R (Phalange) Q9 - D L/M (Phalange) |
| 9PGYQJ-5171 | Impression #7 & #9 are the medial flange of the finger. |
| 9UK3BB-5175 | Were necessary determinate the hand and finger with the flow of the ridges. |
| B2HKRY-5171 | Q2 Supplied POIs excluded Q8 Supplied POIs excluded |
| B6JHFK-5171 | Q7 was inconclusive with similarities to Item D finger joint #9 (Left ring), the conclusion is based on the observed data having areas in agreement; however, not providing a sufficient degree of support for one proposition of the source of the latent print over the other. |
| BMHUNL-5171 | Q7 is phalange area Q9 is phalange area |
| CB8G97-5175 | Another fine CTS Latent Print Proficiency Test. |
| HJUQPA-5175 | #7 - Inconclusive - Only 8 matching minutiae were located and two of those are obscure. This does not support our SOP's metric for a suitable identification. It is likely D, left ring. #9 - Only 10 matching minutiae were located and two of those are obscure. This does not support our SOP's metric for a suitable identification. It is likely D, left middle. |
| JBE87A-5175 | Although Q7 is likely D LR and Q9 is D LM, both items lacked sufficient detail and clarity for a firm conclusion under our LP exam standards. |

TABLE 2

| WebCode-Test | Additional Comments |
|--------------|--|
| JMD2TK-5175 | Q7-Used LP of D for ID Q9-used LP of D for ID |
| LGHV49-5175 | For the Items Q7 & Q9 (second joints) was used a fingerprint card (Item D) and results were indicated as a fingers numbers in sequence #9 - LR & #8 - LM. |
| LMURYB-5175 | Q7 was located on Individual D's 10-print KLR and left palm print exemplars. Q9 was located on Individual D's 10-print KLM and left palm print exemplars. |
| UEKATV-5175 | For the comparison conclusions of Items Q7 and Q9, the palm print exemplars were used to complete the comparisons. Q7 was identified to the 2nd segment of the left ring finger (#9) of Item D and Q9 was identified to the 2nd segment of the left middle finger (#8) of Item D. |
| WQYZUX-5175 | Items Q.7 & Q.9 were identified to the phalange areas of the finger nominated in the results. |
| XULF9V-5175 | Q7= phalange Item D left LR Q9= phalange lem D Left LM |
| Y2BKBF-5175 | Answer Key: 1 A #5 Right Little Finger, 2 Not Identified, 3 C #9 Left Ring, 4 A #3 Right Middle, 5 B Right Palm, 6 D #1 Right Thumb, 7 D #9 Left Ring, 8 Inconclusive due to the quality of the known inked impressions, 9 D Left Middle (Second Digit), 10 C #1 Right Thumb, 11 D Left Palm. |
| YEQ9YZ-5175 | As with past tests with digitized samples and knowns on a disk, I find them difficult to work with in photo enhancement programs. I almost always have to batch process the images in Irfanview and convert them to jpg's to work with. |
| YKDH8R-5175 | L7=Joint on #9 finger of D (palm card used) L9=Joint on #8 finger of D (palm card used) |
| YMGYDF-5171 | Q7 - identified as the Left Ring Finger (phallange) Q9 - identified as the Left Middle Finger (phallange) |
| Z3TWVL-5175 | Q7 = D 9 II Phalanx. Q9 = D 8 II Phalanx. |
| ZWKB2G-5171 | El item Q7 se identifico con la segunda falange del dedo anular de la mano izquierda. El item Q9 se identifico con la segunda falange del dedo medio de la mano izquierda. [Translation by CTS: Item Q7 was identified with the second phalanx of the ring finger of the left hand. Item Q9 was identified with the second phalanx of the middle finger of the left hand.] |

-End of Report-
(Appendix may follow)

Collaborative Testing Services ~ Forensic Testing Program

Test No. 24-5171: Latent Print Examination

DATA MUST BE SUBMITTED BY **Oct. 28, 2024, 11:59 p.m. EDT** TO BE INCLUDED IN THE REPORT

Participant Code: U1234A

WebCode: 2XGYC6

The Accreditation Release section can be accessed by using the "Continue to Final Submission" button above. This information can be entered at any time prior to submitting to CTS.

Scenario:

Investigators have submitted eleven latent prints and have asked that they be compared to the known fingerprints and palm prints they have provided.

Items Submitted (Sample Pack LPP2 - Photographs):

Item A: Known fingerprints and palm prints of Individual A

Item B: Known fingerprints and palm prints of Individual B

Item C: Known fingerprints and palm prints of Individual C

Item D: Known fingerprints and palm prints of Individual D

Items Q1 - Q11: Eleven latent prints recovered from the scene

1.) Indicate the results of your comparisons by marking the appropriate boxes.

Please indicate the specific finger or palm identified for each latent print in this test.

For data submission purposes, consider all phalanges of a finger as part of the finger, not the palm.

If the identification of a latent fingerprint is made utilizing the palm print exemplar, please indicate ONLY the identified finger. The exemplar used for identification (e.g. LP, RP) may be documented in the Additional Comments but is not required.

If a conclusive identification cannot be made, check "Not Identified" or "Inconclusive" based on your laboratory policies/procedures. Do NOT leave a blank response.

Should a print(s) be marked "Inconclusive," please document the reason in the Additional Comments section of this data sheet.

2.) Additional Comments

Please note: Any additional formatting applied in the free form space below will not transfer to the Summary Report and may cause your information to be illegible. This includes additional spacing and returns that present your response in lists and tabular formats.

Should a print(s) be marked "Inconclusive," please document the reason in the Additional Comments section of this data sheet.

Note: Written conclusions are not required for this test. They are not to be substituted for additional comments.

RELEASE OF DATA TO ACCREDITATION BODIES

The Accreditation Release is accessed by pressing the "Continue to Final Submission" button online and can be completed at any time prior to submission to CTS.

CTS submits external proficiency test data directly to ANAB and/or A2LA. Please select one of the following statements to ensure your data is handled appropriately.

- This participant's data is intended for submission to ANAB and/or A2LA. (Accreditation Release section below must be completed.)
- This participant's data is **not** intended for submission to ANAB and/or A2LA.

Have the laboratory's designated individual complete the following steps **only if your laboratory is accredited in this testing/calibration discipline** by one or more of the following Accreditation Bodies.

Step 1: Provide the applicable Accreditation Certificate Number(s) for your laboratory.

ANAB Certificate No.

A2LA Certificate No.

Step 2: Complete the Laboratory Identifying Information in its entirety.

Authorized Contact Person and Title

Laboratory Name

Location (City/State)
