## Blood Alcohol Analysis

### Test No. 24-5641 Summary Report

Each sample set contained four vials of blood with differing concentrations of ethanol. Participants were asked to determine the blood alcohol concentration of each item. Data were returned from 266 participants and are compiled into the following tables:

	<u>Page</u>
<u>Manufacturer's Information</u>	<u>2</u>
<u>Summary Comments</u>	<u>3</u>
<u>Table 1: Reported Results</u>	<u>4</u>
<u>Table 2: Reporting Procedures</u>	<u>18</u>
<u>Table 3: Raw Data and Statistical Analysis</u>	<u>26</u>
<u>Table 4: Method of Analysis</u>	<u>63</u>
<u>Table 5: Additional Comments</u>	<u>74</u>
<u>Appendix: Data Sheet</u>	

This report contains the data received from the participants in this test. Since these participants are located in many countries around the world, and it is their option how the samples are to be used (e.g., training exercise, known or blind proficiency testing, research and development of new techniques, etc.), the results compiled in the Summary Report are not intended to be an overview of the quality of work performed in the profession and cannot be interpreted as such. The Summary Comments are included for the benefit of participants to assist with maintaining or enhancing the quality of their results. These comments are not intended to reflect the general state of the art within the profession.

Participant results are reported using a randomly assigned "WebCode". This code maintains participant's anonymity, provides linking of the various report sections, and will change with every report.

## Manufacturer's Information

Each sample set consisted of four vials of blood, each with a different blood alcohol concentration (BAC). Participants were asked to analyze the contents of each vial and report the blood alcohol concentration.

**SAMPLE PREPARATION:** A stock solution of 10% ethanol in water was used to spike each item. The stock solution was prepared by combining absolute ethanol with distilled water and stored appropriately to prevent evaporation.

**ITEMS 1, 2, 3, and 4 (PREPARATION):** Sample preparation consisted of adding a predetermined amount of ethanol stock solution to pooled human whole blood. The equivalent of 1% w/v sodium fluoride was added and then stirred. A volume of 5 mL of the mixture was pipetted into each of the pre-labeled vials, which contained 12 mg potassium oxalate and 15 mg sodium fluoride (this NaF was included in the 1% w/v NaF calculation). The vials were sealed and inverted to mix the chemicals in the vials with the blood solution. All vials were placed in a refrigerator immediately after production and remained there until the sample sets were prepared.

**VERIFICATION:** Predistribution results were consistent with each other and the manufacturer's preparation information. All participating labs used GC-FID for analysis.

**SAMPLE SET ASSEMBLY:** Once verification was completed, each sample set was assembled with an Item 1, 2, 3 and 4 and placed into a Department of Transportation regulated shipping container. Sample sets were returned to the refrigerator until shipment.

Item	Preparation BAC (g/100 mL)
1	0.08
2	0.25
3	0.30
4	0.17

Please note that the Preparation BAC is the value used for calculations during the test preparation phase and may not necessarily represent the final concentration of the samples. It is advised to view the Grand Mean statistics available in this Summary Report as well as wait for the Individual Reports before evaluating performance.

## **Summary Comments**

---

This test was designed to allow participants to assess their proficiency in the quantitative analysis of ethanol in human blood. Participants were supplied with four vials of blood (Items 1-4), each of which had been spiked with differing amounts of ethanol to produce each preparation blood alcohol concentration (BAC). Participants were requested to determine the blood alcohol concentration for Items 1 - 4. Refer to the Manufacturer's Information for preparation details.

Table 1: Reported Results shows the BAC and uncertainty that each participant would report according to their normal reporting procedures (e.g. mean, lowest result, truncated average). Table 3: Raw Data shows the results in specified units (g/100 mL) from each determination made by the laboratory to produce their reported result. The raw data was used to calculate the grand mean and the standard deviation for each item. The grand mean and standard deviation are supplied to assist the participants and accrediting bodies in determining the acceptability of the results. Participants with extreme data ( $\pm 5$  STD from grand mean) have been marked with an "X", and their results were excluded from the calculations of the grand mean and standard deviation. Of the 266 responding participants, seven participants reported extreme data for one or more items. Of these, one participant had extreme data for all four items, two participants reported extreme data for three of the items, and one participant reported extreme data for two of the items. There were three participants that reported extreme data for only one of the items.

For Item 1, six participants reported extreme data and one participant did not report raw data. For Item 2, three participants reported extreme data. For Item 3, two participants reported extreme data and one participant did not report raw data. For Item 4, four participants reported extreme data and two participants did not report raw data for this item.

The majority of the population used the mean of duplicate/several determinations for their reporting procedures. The most utilized method of analysis among participants was Headspace GC/FID.

# Reported Results

*What is the blood alcohol concentration of the sample in each of the vials?*

# **Reporting Procedures**

TABLE 2

<b>WebCode</b>	<b>Reporting Procedures</b>
2LFQ46	The mean of duplicate/several determinations.
2LXVL4	The mean of duplicate/several determinations.
2UUMUX	The mean of duplicate/several determinations.
2VLL9V	The mean of duplicate/several determinations.
36RQYR	The mean of duplicate/several determinations.
372VCF	The mean of duplicate/several determinations.
37N793	The mean of duplicate/several determinations.
38VLHU	The lowest value of duplicate/several determinations.
3JRRCT	The mean of duplicate/several determinations.
3JUFT7	The mean of duplicate/several determinations.
3N8ZYR	Items analyzed in duplicate. Results of duplicate samples averaged and truncated to the third decimal place.
3T2WNJ	The lowest value of duplicate/several determinations.
3WEUW7	The mean of duplicate/several determinations.
3ZBJBR	The mean of duplicate/several determinations.
42H833	The mean of duplicate/several determinations.
43JXHX	The mean of duplicate/several determinations.
44UZ4W	The mean of duplicate/several determinations.
47YKV3	The mean of duplicate/several determinations.
48AGD2	The mean of duplicate/several determinations.
49A9RW	The mean of duplicate/several determinations.
4CLBFD	The lowest value of duplicate/several determinations.
4EE868	the mean of duplicate determinations truncated to 3 decimal places
4M8FPX	mean of duplicate determinations rounded down to 3 decimal places, and uncertainty rounded up to three decimal places
4R37VA	The mean of duplicate/several determinations.
4U72EC	The lowest value of duplicate/several determinations.
4WQ3AY	The mean of duplicate/several determinations.
4ZWEGZ	The mean of duplicate/several determinations.
648P89	The mean of duplicate/several determinations.
69KP4Z	The mean of duplicate/several determinations.
6DWD4W	The mean of duplicate/several determinations.
6E8JZX	The lower of two replicate samples with the third digit truncated
6JMRNX	The mean of duplicate/several determinations.
77WHEX	The lower of two replicate samples with the third digit truncated
79EUYK	The mean of duplicate/several determinations.

TABLE 2

WebCode	Reporting Procedures
7JWG3U	The mean of duplicate/several determinations.
7TKAGC	The mean of duplicate/several determinations.
7UDZMQ	The lowest value of duplicate/several determinations.
7WNRTL	The mean of duplicate/several determinations.
87NTRC	The mean of duplicate/several determinations.
8BJKZ9	The mean of duplicate/several determinations.
8BX92Z	The mean of duplicate/several determinations.
8D4LUU	The mean of duplicate/several determinations.
8EKR3X	The mean of duplicate/several determinations.
8FTZAW	The mean of duplicate/several determinations.
8VN39P	The lowest value of duplicate/several determinations.
8VNCUU	The mean of duplicate/several determinations.
8XDTXZ	The mean of duplicate/several determinations.
94E34T	The mean of duplicate/several determinations.
99964M	The mean of duplicate/several determinations.
9C9D9W	The mean of duplicate/several determinations.
9E24K3	The mean of duplicate/several determinations.
9K3MAE	The lowest value of duplicate/several determinations.
9NJUXE	The mean of duplicate/several determinations.
9UQL2K	Triplet runs, averaged, reported at minus 3 standard deviations, rounded down to whole number
9WYJKU	The mean of duplicate/several determinations.
9YM3LR	The mean of duplicate/several determinations.
A6MN3T	The mean of duplicate/several determinations.
AA43VT	The mean of duplicate/several determinations.
AF4LV4	duplicate analysis
AJMMQP	The mean of duplicate/several determinations.
AKFJFJ	The mean of duplicate/several determinations.
AMHGNQ	The mean of duplicate/several determinations.
APENG6	The lowest value of duplicate/several determinations.
ARXPCQ	The lowest value of duplicate/several determinations.
B64DRR	The mean of duplicate/several determinations.
B6YXEQ	The mean of duplicate/several determinations.
B7FV8Q	The mean of duplicate/several determinations.
BGWUGT	The mean of duplicate/several determinations.
BJJDHQ	The lowest value of duplicate/several determinations.
BMN4QQ	The mean of duplicate/several determinations.
C2JQQR	The lower of two replicate samples with the third digit truncated

TABLE 2

WebCode	Reporting Procedures
C8Z9ZT	Second Result as Confirmation
C9ETT3	The mean of duplicate/several determinations.
CCE78F	the second analytical determination
CEKGCV	The mean of duplicate/several determinations.
CH4GQQ	The lowest value of duplicate/several determinations.
CJG7T4	The mean of duplicate/several determinations.
CLZ8NP	The mean of duplicate/several determinations.
CNBZQ6	The lowest value of duplicate/several determinations.
D29KHR	The mean of duplicate/several determinations.
D9WYRT	The mean of duplicate/several determinations.
DD6HT7	The lowest value of duplicate/several determinations.
DEVPRA	The mean of duplicate/several determinations.
DFAAKK	The mean of duplicate/several determinations.
DKPH9J	The lowest value of duplicate/several determinations.
DRLLRM	The mean of duplicate/several determinations.
DUDHGG	The mean of duplicate/several determinations.
EGMYNW	The mean of duplicate/several determinations.
EJ7ZHJ	The mean of duplicate/several determinations.
EJEX3V	The mean of duplicate/several determinations.
ELYW8D	The mean of duplicate/several determinations.
ER6FG4	The mean of duplicate/several determinations.
ETXHWR	The mean of duplicate/several determinations.
EWTCUT	The mean of duplicate/several determinations.
F9JLTL	The mean of duplicate/several determinations.
FCQU8X	The mean of duplicate/several determinations.
FDHQWR	The mean of duplicate/several determinations.
FKZYKN	The mean of duplicate/several determinations.
FNKZFA	The mean of duplicate/several determinations.
FP9J6E	The mean of duplicate/several determinations.
FU749X	The truncated mean of several determinations +/- the uncertainty of measurement
FWXZXR	The mean of duplicate/several determinations.
FYZX9K	The mean of duplicate/several determinations.
G8788X	The mean of duplicate/several determinations.
G8BLJX	The mean of duplicate/several determinations.
GDB3TH	Mean of duplicate determinations, truncated to 3 decimals places.
GGXKB4	The lowest value of duplicate/several determinations.
GJ439Y	The lowest value of duplicate/several determinations.

TABLE 2

## **Additional Comments**

TABLE 5

WebCode	Additional Comments
37N793	Our values go to 5 significant figures, and when reported, the averaged value is truncated to 3 significant figures.
3JRRCT	Items 1 & 4 from the 2nd box were not analyzed.
3N8ZYR	LOD= 0.005 g/100 mL, LOQ= 0.020 g/100 mL, uncertainty of measurement is +/- 5% of the quantitative value with a level of confidence of greater than 99.73%. Acetaldehyde detected in items 1, 2, 3 and 4. Acetone also detected in item 4.
3T2WNJ	Item 3 and Item 4 were screened by diffusion and confirmed by Headspace GC/FID
48AGD2	The laboratory procedure involves removing 6% from the measured average alcohol concentration before being reported to the customer.
49A9RW	All average reported results were calculated using 5 decimal points. The above form only allows for an input of 4 points.
4R37VA	GC#8 The blood alcohol concentration reported in 1a [Table 1 - Reported Results]. above represents a truncated average value of duplicate analyses measuring e.g. 0.082% and 0.082%. The average value of the duplicate analyses with its expanded uncertainty is e.g. 0.082% +/- 0.004%. The expanded uncertainty is reported at a 99% confidence level.
87NTRC	Results entered in to section 2 [Table 3 - Raw Data & Statistical Analysis] are truncated to 4 decimal places while the testing laboratory records 5 decimal places.
8EKR3X	Results are averaged and then truncated to third decimal place, not rounded up. Raw data is five decimals.
8FTZAW	ULOQ is 0.300 gram%
8VNCUU	IS: 1M NaCl 0.02% n-propanol
9UQL2K	Please note Acetone was detected in Item 4; qualitative determination only. Laboratory does not presently incorporate uncertainty measurement in reporting.
9YM3LR	ISTD: N-propanol
AJMMQP	GC-FID
BJJDHQ	Samples run in duplicate. lowest value is taken for final result
CJG7T4	The reported value is the average of 4 results truncated to 3 decimal places.
D29KHR	The final report values on the report are truncated, two digit mean and the three digit mean +/- UOM follow. Item #1 - 0.08; Item #2 - 0.25; Item #3 - 0.29; Item #4 - 0.19.
EJEX3V	Acetone was detected in all four samples but was below the cutoff for reporting per local policy.
ETXHWR	The final reported values on the report are truncated, two digit mean and then the three digit mean +/- UOM follow. Item#1-0.08; Item#2-0.25; Item#3-0.29; Item#4-0.19
FU749X	Uncertainty of measurement (5% at the 99.7% confidence interval) is calculated from the mean of several determinations, rounded up (to 3 decimal places), and is reported in the same units as results. Sample tubes were not completely filled - headspace over the samples may contribute to some loss of volatiles. Ethyl Alcohol indicated with values of less than 0.020g/100cc, but greater than 0.000g/100cc, are reported out as "below reportable limit".
H6Z28H	Heel laat binnen gekregen! [Requested translation was not provided by time of publication.]
JZNFXB	* uncertainty range is reported at a level of confidence greater than 99.73%.
K66G8K	The laboratory is unable to provide MU due to in the process of review.

TABLE 5

WebCode	Additional Comments
KLZPEY	IS used: N-propanol
LGKHQZ	According to [State Regulation]: "For blood test for alcohol content, the accepted scientific uncertainty in measurement is plus or minus 0.005g/100mL or 10 percent of the average of measurements, whichever is greater."
LU6WTY	According to protocols, any result under 0.02 g/100mL or over 0.30 g/100mL will not have a measurement of uncertainty listed on the report.
LX69PY	Sample 3 outside of current calibration. MOC would be 0.020.
M3YPEX	According to [State Regulation] "For blood tests for alcohol content, the accepted scientific uncertainty in measurement is plus or minus 0.005 g/100 mL or 10 percent of the average measurements, whichever is greater."
MCMF2Q	Uncertainty of Measurement is 5.5% of the nominal value or 0.004, whichever is greater, at k=3.
MUJRN7	Uncertainty of measurement (5% at the 99.7% confidence interval) is calculated from the mean of several determinations, rounded up (to 3 decimal places), and reported in the same units as results. Sample tubes not completely filled - headspace over samples may contribute to some loss of volatiles.
P9DAEF	ULOQ is 0.300 gram %
Q3662M	GC# 9. The blood alcohol concentration reported in 1a [Table 1 - Reported Results] represents a truncated average value of duplicate analyses measuring e.g. 0.083 % and 0.083 %. The average value of the duplicate analyses with its expanded uncertainty is e.g. 0.083 +/- 0.004%. The expanded uncertainty is reported at a 99% confidence level.
QD232F	The laboratory is unable to provide MU due to in the process of review.
QEEUUW	El método utilizado fue por estándar interno. [Requested translation was not provided by time of publication.]
QN74PL	Received and analyzed on 2/21/2024. The results are expressed as the measured value +/- the expanded uncertainty, which corresponds to a 99.7% level of confidence. The final UM for blood is +/- 5.5% or +/- 0.004, whichever is greater, at a k=3.
QX4DK9	Note that our laboratory's policy is that we do not report uncertainty of measurement on our final reports, which is why it was not reported for this survey. However, our uncertainty of measurement is included for each sample in its corresponding case file/discovery packet, which includes all raw data.
RC9MB4	Tube A=1; Tube B=2; Tube C=3; Tube D=4 Initial write-up documentation conducted by [Analyst] on 2/13/2024.
T644PK	GC# 9 The blood alcohol concentration reported in 1a [Table 1 - Reported Results]. above represents a truncated average value of duplicate analyses measuring e.g., 0.082% and 0.083%. The average value of the duplicate analyses with its expanded uncertainty is e.g., 0.082% ± 0.004%. The expanded uncertainty is reported at a 99% confidence level.
UFJG2K	Analysis by gas chromatography with flame ionization detection, a method approved by the Commissioner of Public Safety, in whole blood for: Analyte Quantitative Range (g/100 mL) Ethanol 0.010 – 0.400 Measurement uncertainty is reported at a 99.73% level of confidence for all blood ethanol analyses. All reported results are average values.
UJGT7X	Acetone identified below cutoff for reporting in Item #4.
UQHACX	results reported as truncated to 3 decimal places.
V8K8BM	Uncertainty of measurement (5% at the 99.7% confidence interval) is calculated from the mean of several determinations, rounded up (to 3 decimal places), and reported in the same units as results. Sample tubes not completely filled - headspace over samples may contribute to some loss of volatiles.
VD4J29	Results are normally subtracted by 6mg% at our Laboratory as per test method.

TABLE 5

WebCode	Additional Comments
XBTJVR	The samples were in non-[Agency] containers.
XWQZ7E	GC #8 The blood alcohol concentration reported in 1a [Table 1 - Reported Results] above represents a truncated average value of duplicate analysis measuring e.g. 0.082% and 0.083%. The average value of the duplicate analysis with its expanded uncertainty is e.g. 0.082 +/- 0.004%. The expanded uncertainty is reported at a 99% confidence level.
XYBYBV	Uncertainty of measurement (5% at the 99.7% confidence interval) is calculated from the mean of several determinations, rounded up (to three decimal places), and is reported in the same units as results. Sample tubes were not completely filled - headspace over the samples may contribute to some loss of volatiles. Ethyl Alcohol indicated with values of less than 0.020g/100cc, but greater than 0.000g/100cc, are reported out as "below reportable limit".
YNE7L6	Internal standard: n-propanol. LOD ethanol: 3 mg/100 mL. LOQ ethanol: 15 mg/100 mL.
YVFKCD	Samples were analyzed on GC#8. The blood alcohol concentration reported in 1a [Table 1 - Reported Results] represents a truncated average value of duplicate analyses measuring for example 0.083% and 0.081%. The average value of the duplicate analyses with its expanded uncertainty is 0.082% +/- 0.004%. The expanded uncertainty is reported at a 99% confidence level.
YXYL7Y	Instrument was a Headspace GC/FID with dual column/dual FID. The internal standard was n-propanol.
Z9J7CG	Currently we only report uncertainty when it is near a legal cutoff threshold

-End of Report-  
(Appendix may follow)

Collaborative Testing Services ~ Forensic Testing Program

**Test No. 24-5641: Blood Alcohol Analysis**

DATA MUST BE SUBMITTED BY **April 01, 2024, 11:59 p.m. EDT** TO BE INCLUDED IN THE REPORT

Participant Code: U1234K

WebCode: CZMAGF

The Accreditation Release section can be accessed by using the "Continue to Final Submission" button above. This information can be entered at any time prior to submitting to CTS.

**Test Description:**

Investigators have submitted four tubes of blood from separate cases to be examined; each was taken from a person suspected of driving under the influence of alcohol. Using your laboratory's procedures, analyze each tube and report the blood alcohol concentration.

*Please disregard the tube's labeling with regard to NaF; additional NaF was added to achieve a 1% w/v concentration in the blood.*

**Items Submitted (Sample Pack BAC1):**

Items 1-4: Vials of Blood

**1a.) What is the blood alcohol concentration of the sample in each of the items? (Results should be reported using your laboratory reporting criteria for decimal places, uncertainty determinations, and units.)**

	Uncertainty (k=	)	Units
Item 1:	±	(	)
Item 2:	±	(	)
Item 3:	±	(	)
Item 4:	±	(	)

**1b.) Are the values listed above:**

The mean of duplicate / several determinations?

The lowest value of duplicate / several determinations?

Other? (Specify):

2.) Please list your raw data determinations below in g/100mL. (Results not reported in g/100mL will be excluded from statistical calculations).

### Average

*Raw Data averages are being provided to assist in confirming data entry.*

*Note to our international clients: due to differences in metric formatting and browser settings, averages may be off by a factor.*

**3a.) Date Samples Received:**

**3b.) Date(s) Samples Analyzed:**

#### **4.) Method of Analysis:**

## Headspace

□ GC □ GC/MS □ GC/FID □ GC/MS/FID

## Direct Injection GC

Other:

## 5.) Additional Comments

**Please note:** Any additional formatting applied in the free form space below will not transfer to the Summary Report and may cause your information to be illegible. This includes additional spacing and returns that present your responses in lists and tabular formats.

## RELEASE OF DATA TO ACCREDITATION BODIES

The Accreditation Release is accessed by pressing the "Continue to Final Submission" button online and can be completed at any time prior to submission to CTS.

CTS submits external proficiency test data directly to ANAB and/or A2LA. Please select one of the following statements to ensure your data is handled appropriately.

- This participant's data is intended for submission to ANAB and/or A2LA. (Accreditation Release section below must be completed.)  
 This participant's data is **not** intended for submission to ANAB and/or A2LA.

Have the laboratory's designated individual complete the following steps  
**only if your laboratory is accredited in this testing/calibration discipline**  
by one or more of the following Accreditation Bodies.

**Step 1: Provide the applicable Accreditation Certificate Number(s) for your laboratory**

ANAB Certificate No.

A2LA Certificate No.

**Step 2: Complete the Laboratory Identifying Information in its entirety**

Authorized Contact Person and Title
