Latent Print Examination

Test No. 25-5171/5 Summary Report

Each participant received a sample pack containing one of the following: physically printed photographs (5171) or downloadable digital images (5175) of twelve latent prints and four sets of known fingerprints and palm prints. Participants were asked to compare these items and report their findings. Data were returned from 375 participants: 112 for 25-5171, and 263 for 25-5175 and are compiled into the following tables:

	<u>Page</u>
<u>Manufacturer's Information</u>	<u>2</u>
<u>Summary Comments</u>	<u>3</u>
<u>Table 1: Latent Print Comparisons</u>	<u>4</u>
<u>Table 2: Additional Comments</u>	<u>23</u>
<u>Appendix: Data Sheet</u>	

This report contains the data received from the participants in this test. Since these participants are located in many countries around the world, and it is their option how the samples are to be used (e.g., training exercise, known or blind proficiency testing, research and development of new techniques, etc.), the results compiled in the Summary Report are not intended to be an overview of the quality of work performed in the profession and cannot be interpreted as such. The Summary Comments are included for the benefit of participants to assist with maintaining or enhancing the quality of their results. These comments are not intended to reflect the general state of the art within the profession.

Participant results are reported using a randomly assigned "WebCode". This code maintains participant's anonymity, provides linking of the various report sections, and will change with every report.

Manufacturer's Information

Each sample pack contained photographs, in either a physically printed format or digitally downloadable, consisting of known fingerprints and palm prints of four individuals and latent "crime scene prints" as listed below. Participants were asked to indicate the specific finger or palm identified for each latent print in this test.

SAMPLE PREPARATION: All inked known fingerprints and powder-dusted latent prints were scanned directly into image editing software. Images were assembled onto test templates, and background noise of each latent print was digitally reduced. For the physical photographs, the latent prints were provided in 1x and 2x magnification.

VERIFICATION: Predistribution results were consistent with each other and the manufacturer's preparation information.

SAMPLE PACK ASSEMBLY: Once verification was complete and sample preparation was done, each photo set was packaged and sealed. Digitally downloadable material was zipped and uploaded to the CTS Portal.

Latent No.	Print Source
Q1	Item B, Right Index (B, RI)
Q2	Item A, Right Little (A, RL)
Q3	Item A, Left Palm (A, LP)
Q4	Item C, Right Index (C, RI)
Q5	Not Provided, - (NI)
Q6	Item A, Right Middle (A, RM)
Q7	Item D, Left Ring (D, LR)
Q8	Item A, Left Thumb (A, LT)
Q9	Item A, Left Middle (A, LM)
Q10	Not Provided, - (NI)
Q11	Item B, Right Middle (B, RM)
Q12	Item C, Left Ring (C, LR)

Summary Comments

This test was designed to allow participants to assess their proficiency in the comparison of latent finger and palm prints. Participants were supplied with either digitally produced photographs or downloadable digital images of twelve latent prints and four sets of known fingerprints and palm prints. Ten latent prints (Q1-Q4, Q6-Q9, Q11-Q12) were made by the four individuals for whom inked prints were provided (Items A-D). Two latent prints (Q5 and Q10) were from one individual for whom inked prints were not provided. Refer to the Manufacturer's Information for preparation details.

Of the 375 responding participants, 345 (92%) reported the ten identifications and two non-identifications (NI) consistent with the manufacturer's preparation information. In establishing the consensus, inconclusive (INC) results are included with non-identifications.

Thirty participants reported inconsistent results for one or more of the latent prints. With the exception of Q7, these inconsistencies included five other identifications and one Inconclusive response spread across five prints.

For the Q7 latent print, 29 participants reported an inconsistent result. Fifteen participants reported "Not Identified", and two participants reported "Inconclusive" for the entire response. There were 12 participants who reported other identifications, this included six who identified the left palm of Individual D instead of the left ring finger, two who identified individual D, but reported a different finger or were inconclusive on the finger identification, and four who reported other inconsistent identifications, for which no trend was identified.

Latent Print Comparisons

Additional Comments

TABLE 2

WebCode-Test	Additional Comments
43ENEV-5171	Q7- Medial Phalange, plain impressions and left palm print of Individual D used for comparison and identification.
4YYG94-5175	Q7. Ident with the Left Ring Phalange. I used the image on the Tenprint Set (plain) and not the palm.
6NE3UL-5175	Latent Question 7: Left Ring phalange
6RDDPK-5175	Q7: Item D - LR medial phalange
BKXPCK-5171	Q6 identified to Item A right middle using exemplar marked Item A (Right Palm). Q7 identified to Item D left ring using exemplar marked Item D (Left Palm).
C2GYUZ-5175	Ten (10) identifiable latent fingerprints, one (1) identifiable latent palmprint, and one (1) identifiable latent impression (finger joint) were noted on Item 5 (5A-5L), designated 5A-1, 5B-1, 5C-1, 5D-1, 5E-1, 5F-1, 5G-1, 5H-1, 5I-1, 5J-1, 5K-1, and 5L-1. The twelve (12) identifiable latent prints were compared to Items 1, 2, 3, and 4 with the following results: Two (2) of the identifiable latent fingerprints were compared to Items 1, 2, 3, and 4 and were excluded as having been made by the same sources (5E-1 and 5J-1). Four (4) of the identifiable latent fingerprints and the one (1) identifiable latent palmprint were identified as having been made by Individual A (Item 1): One (1) by the right middle finger, One (1) by the right little finger, One (1) by the left thumb, One (1) by the left middle finger, and One (1) by the left palm. The four (4) identifiable latent prints were compared to Items 2, 3, and 4 and were excluded as having been made by the same sources. Two (2) of the identifiable latent fingerprints were identified as having been made by Individual B (Item 2): One (1) by the right index finger and One (1) by the right middle finger. The two (2) identifiable latent fingerprints were compared to Items 1, 3, and 4 and were excluded as having been made by the same sources. Two (2) of the identifiable latent fingerprints were identified as having been made by Individual C (Item 3): One (1) by the right index finger and One (1) by the left ring finger. The two (2) identifiable latent prints were compared to Items 1, 2, and 4 and were excluded as having been made by the same sources. The one (1) identifiable latent impression was identified as having been made by the left ring finger of Individual D (Item 4). The one (1) identifiable latent impression was compared to Items 1, 2, and 3 and was excluded as having been made by the same sources.
C6ZPQH-5175	Q7 has not been identified but it's a phalanx and item B can not be excluded due to incomplete unrolling.
D6VTBX-5175	Q7 was identified to the proximal and medial joints of the #9 (Left ring) finger on the left palm print card exemplar.
FHBCLJ-5175	Prints 5 and 10 could be used to make an identification; but they aren't from the known persons given.
GAEKLA-5175	Q7 is a phalange from the left palm/left ring finger.
GT9Z77-5175	Q7: identified to D left ring phalanges using the left palm print.
HUJPZP-5175	Q7 is a digit, identified via the left palm exemplar. Unsure whether to code the answer as a finger or palm, but ultimately elected to indicate a finger based on the instructions on the scenario page.
KUAU69-5175	Q7= D 9 (LR) II and III Phalanx

TABLE 2

WebCode-Test	Additional Comments
L3E2K9-5175	NOTE: Q7 matching with D (LR) and matching with D (LP)
LFWZZW-5175	In regards to question #7. I indicated the answer was card D, left palm. I also used the slap from the left ring finger on the 10-print card to make the identification.
UYTG4P-5175	For comparison of Q7 (second and third joints) was used a fingerprint card of the Item D and the result is indicated as finger #9 LR.
W4U6K4-5175	Question 7 has limited minutiae which would make identification difficult. Exemplar B is a possible candidate but the finger portion of the card is of poor quality so it cannot be excluded.
XJ49NA-5175	Q7 - L Ring Medial and Proximal Phalange (tenprint plain impressions used)
YBNGHP-5175	Another fine CTS latent print proficiency test.
ZFBQ6R-5171	This year's test was incredibly simple, and I do not feel it adequately represented the quality of latent prints that we are typically required to examine in casework. This test felt as though it was geared for a beginner starting out in latent print examination. I do not feel this test shows any measure of capabilities with more difficult latent comparisons.

-End of Report-
(Appendix may follow)

Test No. 25-5171: Latent Print ExaminationDATA MUST BE SUBMITTED BY **Oct. 20, 2025, 11:59 p.m. EDT** TO BE INCLUDED IN THE REPORT

Participant Code: U1234A

WebCode: AUN4HC

The Accreditation Release section can be accessed by using the "Continue to Final Submission" button above. This information can be entered at any time prior to submitting to CTS.

Scenario:

Investigators have submitted twelve latent prints and have asked that they be compared to the known fingerprints and palm prints they have provided.

Items Submitted (Sample Pack LPP2 - Photographs):

Item A: Known fingerprints and palm prints of Individual A

Item B: Known fingerprints and palm prints of Individual B

Item C: Known fingerprints and palm prints of Individual C

Item D: Known fingerprints and palm prints of Individual D

Items Q1 - Q12: Twelve latent prints recovered from the scene

1.) Indicate the results of your comparisons by marking the appropriate boxes.

Please indicate the specific finger or palm identified for each latent print in this test.

For data submission purposes, consider all phalanges of a finger as part of the finger, not the palm.

If the identification of a latent fingerprint is made utilizing the palm print exemplar, please indicate ONLY the identified finger. The exemplar used for identification (e.g. LP, RP) may be documented in the Additional Comments but is not required.

If a conclusive identification cannot be made, check "Not Identified" or "Inconclusive" based on your laboratory policies/procedures. Do NOT leave a blank response.

Should a print(s) be marked "Inconclusive," please document the reason in the Additional Comments section of this data sheet.

2.) Additional Comments

Note: Please use appropriate punctuation to indicate the end of sentences, sections, and statements in the free-form space below. Extra spacing and returns used for separation within your text will not transfer and may cause your information to be illegible in the Summary Report. The use of lists and tabular formats to deliver information is also cautioned against, as these do not transfer.

Should a print(s) be marked "Inconclusive," please document the reason in the Additional Comments section of this data sheet.

Note: Written conclusions are not required for this test. They are not to be substituted for additional comments.

RELEASE OF DATA TO ACCREDITATION BODIES

The Accreditation Release is accessed by pressing the "Continue to Final Submission" button online and can be completed at any time prior to submission to CTS.

CTS submits external proficiency test data directly to ANAB and/or A2LA. Please select one of the following statements to ensure your data is handled appropriately.

- ☐ This participant's data is intended for submission to ANAB and/or A2LA. (Accreditation Release section below must be completed.)
- ☐ This participant's data is **not** intended for submission to ANAB and/or A2LA.

Have the laboratory's designated individual complete the following steps **only if your laboratory is accredited in this testing/calibration discipline** by one or more of the following Accreditation Bodies.

Step 1: Provide the applicable Accreditation Certificate Number(s) for your laboratory.

ANAB Certificate No.

A2LA Certificate No.

Step 2: Complete the Laboratory Identifying Information in its entirety.

Authorized Contact Person and Title

Laboratory Name

Location (City/State)
